

What is home automation?

What are the benefits of an automated home?

A Leviton automation system coordinates security, temperatures, lighting, and audio/video automatically for safety, energy savings, and convenience. Automatically dimming lights and changing heating and cooling setpoints when you are away from home can greatly reduce energy costs. Remote access lets you view security video on your smartphone. Adding home automation can also increase the value of your home.

Is the system easy to understand and operate?

Yes. Children can even learn and understand how to use basic features of the system. Day-to-day events are generally automated but can be managed with one button, such as Day, Night, Vacation, or Away. More specific activities are menu driven to change temperature, lights, audio and more.

Can it be controlled over the Internet or telephone?

Yes, and without any monthly fees. All Leviton automation can be monitored and controlled over the Internet or telephone either inside or outside the home. Affordable apps are available for smartphones and tablets. Check and adjust lights, temperature, security, audio, and more.

Not only can you call to check on the status of your home, but your system can actually contact you! Receive phone calls, texts or e-mails to inform you of what is happening at home. Be notified of an alarm or that children are safe as soon as they have returned home from their day at school.

Can the system expand easily if my needs change?

Yes. Add Touchscreens, pool, spa, or irrigation controls, window treatments, remotes, multi-room audio systems, home theater controls, access control, video surveillance, wireless door locks and more. Leviton utilizes many technologies, including both Z-Wave® and ZigBee®. Leviton also partners with dozens of companies in related industries so you can expand and customize your home automation system now, or at any time in the future.

How long has this technology been available?

Leviton has been manufacturing its award-winning home automation systems and accessories since 1985. Since that time, homeowners around the world have been enjoying the energy savings, safety, comfort, and convenience of home automation from the most established and respected manufacturer in the industry.

Leviton is home automation.

Is the system expensive?

Leviton offers a security and home automation system for every lifestyle. Price depends on the size of your home and the options that you desire. Leviton products will make your home more green by making it more energy efficient. As an added benefit you will save money on your energy bills. If used properly, your system can practically pay for itself in energy savings, while increasing the resale value of your home.

Many stand-alone solutions exist and comprehensive systems can be scaled to your property. Your installing dealer will evaluate your home and your family's needs to customize a system that is just right for you.
